github.com/SKhunteta • builtbyshrey.com • US Citizen

Senior engineer with 6+ years building .NET platforms, healthcare and financial integrations, and applied AI systems — architecting MCP/RAG services and directing agent-assisted development through specs, automated tests, and technical review.

EXPERIENCE

Senior Software Engineer · **Careismatic Brands** Remote | Sep 2025 – Present

- Lead integration work for a Microsoft Dynamics ERP migration across a \$500M+ medical-apparel business (15 brands, 70 countries).
- Built an invoice-reconciliation tool enabling Finance to identify and recover missing payments across enterprise systems.
- Developing an EDI 810 invoice integration to automate B2B invoicing with distribution partners.

Senior Software Engineer · **SouthEast Bank** Remote (Seattle, WA) | Jul 2023 – Sep 2025

- Led development of a Loan Origination System (LOS) in Blazor and MS SQL Server, digitizing paper-based lending workflows and cutting loan processing time by 65%.
- Integrated the Equifax API for real-time credit decisions, reducing underwriting turnaround from days to minutes.
- Implemented a custom encryption service protecting database columns holding confidential client data, strengthening security and compliance.
- Raised unit-test coverage from 0% to 94% with Moq and added NLog structured logging, cutting production defects and speeding release cycles.

Software Engineer · **Moxe Health** Remote (Tacoma, WA) | Jun 2022 – Apr 2023

- Built a greenfield multi-cloud clinical data pipeline (AWS + Google Cloud) for a major health insurer, managing all infrastructure with Terraform.
- Decomposed a monolithic .NET application into Docker microservices and built an S3-to-BigQuery pipeline for clinical data processing.
- Processed machine-readable health records through a Camunda workflow engine, producing human-readable PDF charts for health-records coding.

Backend Software Developer · **PacificSource Health Plans** Eugene, OR | Apr 2020 – Jun 2022

- Built internal .NET tooling for provider data — including a C# roster-file ingestion tool adopted by 12+ developers — saving dozens of engineering hours weekly.
- Cleansed and standardized data with Informatica PowerCenter for the MDM environment, and authored end-to-end source-to-target mapping of the provider data lifecycle.

Founder · **COVID Response Collective** Oregon | Mar 2020 – Sep 2020

- Founded and led a 300-person volunteer mutual-aid network — grocery delivery for immunocompromised people, rent assistance, PPE distribution, and mask deliveries to the Navajo Nation and Warm Springs tribe.

SELECTED SYSTEMS

- **BuiltByShrey AI Platform** — React/Express platform with MCP over Streamable HTTP, Qdrant-backed RAG, and structured portfolio & job-fit tools.
- **Sound & Rail** — Real-time Three.js Seattle transit visualization with true network geometry, live vehicle feeds, and automated visual regression.
- **The Life of an AI Chip** — Sourced interactive analysis of AI-hardware chokepoints; provenance and confidence metadata gate every rendered metric.

TECHNICAL SKILLS

AI Systems: MCP, RAG, Qdrant, OpenAI & Anthropic APIs, structured generation, agent workflows

Engineering: C#, .NET, ASP.NET Core, Blazor, SQL, Python, TypeScript, React, Docker

Cloud & Data: AWS, Azure, Google Cloud, BigQuery, Kubernetes, Terraform, REST/EDI, Informatica

EDUCATION

B.S. in Computer Science, minors in Psychology and Writing

Oregon State University
