

SHREYANS KHUNTETA

Senior Software Engineer | AI Systems | Backend & Enterprise Platforms

503-724-0544 • shreyans.khunteta@gmail.com • linkedin.com/in/shreyans-khunteta-3167247a
github.com/SKhunteta • builtbyshrey.com • US Citizen

Senior engineer with 6+ years building .NET platforms, healthcare and financial integrations, and applied AI systems. Architects MCP/RAG services and directs agent-assisted development through detailed specifications, automated tests, and technical review.

EXPERIENCE

Senior Software Engineer · Careismatic Brands

Remote | Sep 2025 – Present

- Lead integration work for a Microsoft Dynamics ERP migration across a \$500M+ medical-apparel business spanning 15 brands in 70 countries.
- Built an invoice-reconciliation tool enabling Finance to identify and recover missing payments across enterprise systems.
- Developing an EDI 810 invoice integration to automate B2B invoicing with distribution partners.

Senior Software Engineer · SouthEast Bank

Remote (Seattle, WA) | Jul 2023 – Sep 2025

- Led development of a Loan Origination System (LOS) using Blazor and MS SQL Server, transforming paper-based lending into dynamic digital workflows and cutting loan processing time by 65%.
- Integrated the Equifax API for real-time credit score retrieval, automating credit review and reducing underwriting turnaround from days to minutes.
- Strengthened data security and compliance by implementing a custom encryption service protecting database columns holding confidential client data.
- Raised unit-test coverage from 0% to 94% using Moq, reducing production defects and enabling faster release cycles for new LOS features.
- Implemented structured application logging with NLog across the LOS, improving error traceability, system monitoring, and issue resolution.
- Spearheaded technical collaboration across cross-functional teams, aligning IT and business goals to deliver solutions meeting regulatory and operational requirements.

Software Engineer · Moxe Health

Remote (Tacoma, WA) | Jun 2022 – Apr 2023

- Built a greenfield multi-cloud clinical data pipeline for a major health insurer across AWS and Google Cloud, managing all infrastructure with Terraform.
- Decomposed a monolithic .NET application into Docker microservices and built an AWS S3-to-BigQuery pipeline for clinical data processing.
- Created REST APIs consumed by internal and external applications.
- Processed machine-readable health record files through a Camunda workflow engine, producing human-readable PDF charts for health-records coding.

Backend Software Developer · PacificSource Health Plans

Eugene, OR | Apr 2020 – Jun 2022

- Developed an internal .NET web application housing multiple team build tools targeted at improving provider data, saving dozens of engineering hours weekly.
- Built a C# roster-file ingestion tool streaming data into a staging database with per-file-type edge-case handling; adopted by 12+ developers and hosted via a companion web page.
- Leveraged Informatica PowerCenter to cleanse and standardize data for loading into the Master Data Management (MDM) environment.
- Created end-to-end source-to-target mapping of the provider data lifecycle, unifying disparate documentation efforts into a single reference document.

Founder · COVID Response Collective

Oregon | Mar 2020 – Sep 2020

- Founded and led a 300-person volunteer mutual-aid network coordinating grocery delivery to immunocompromised people, rent assistance, and PPE distribution.
- Organized mask deliveries to the Navajo Nation and the Warm Springs tribe, and partnered with 2 Towns Ciderhouse to repurpose barrels into handwashing stations for unhoused communities.
- Managed an internship program for Oregon State University New Media Communications students, directing social media and design work approved for college credit.

SELECTED SYSTEMS

- **BuiltByShrey AI Platform** — Architected and deployed a React/Express platform with MCP over Streamable HTTP, Qdrant-backed RAG, structured portfolio and job-fit tools, and canon-aware retrieval.
- **Sound & Rail** — Architected and directed agent-assisted development of a real-time Three.js Seattle transit visualization using true network geometry and live vehicle feeds, with disclosed simulation fallbacks, device-tier rendering, and automated visual regression.
- **The Life of an AI Chip** — Created a sourced interactive analysis of AI-hardware chokepoints; encoded provenance, confidence, and re-verification metadata so unsourced metrics cannot render.

TECHNICAL SKILLS

AI Systems: MCP, RAG, Qdrant, OpenAI & Anthropic APIs, structured generation, Claude Code agent workflows

Engineering: C#, .NET, ASP.NET Core, Blazor, SQL, Python, JavaScript, TypeScript, React, Docker

Cloud & Data: AWS, Azure, Google Cloud, BigQuery, Kubernetes, Terraform, REST/EDI integrations, Informatica

EDUCATION

B.S. in Computer Science, minors in Psychology and Writing

Oregon State University
